

1 - Ask vourself

## Product improvement

If you feel that you can no longer improve your product yourself, then it might be time to see how a potential user experiences your product. That experience can be very valuable for you as a maker to improve certain elements.

The questions at point 1 in this worksheet help you to organize your own thoughts about what you want to test.

Point 2 is about what you want to test. You describe that as clearly as possible. These elements can be about functionality, but also about feelings that occur during use, or the overall feeling of design.

Point 3 is about who will test your product. Try to make sure that this is someone who will also want to use the product.

Point 4 is about where you want to test. A physical place is important unless your product is an online experience or you can experience it online.

Then look at point 5 how you want to test. Link this well to point 2. So setting up a functional test is different from wanting to record someone's feeling.

Point 6 is about the outcome. What do you do with your test results, and have you tested what you want to know.

- For who is it? - What does it do?	- How does it look? - What can you use it fo	<ul><li>How does it work</li><li>or? - Why would anyon</li></ul>		nould this be made?			
- What does it solve?	- What will change if yo	ou use it?					
2 What is your exact	offer you make lookir	ng at the answers of	point 1? What is	s your value proposi	ition?		
2 Who? With which nos	pole can you test it best?	(ovports relevant users	critical parconal				
3 Who? With which peo	ple can you test it best?	experts, relevant users,	critical persons)				
4 Where? Where do you	want to test? Online or i	in a physical place? Whic	ch physical place(	s) and why?			
		a prijerear praese	5.1. p.1.ye.sa. p. 0.5(	9, 21.2			
5 How? How do you wa	ant to test? (interview or g	uestionnaires)					
Be sharp and critical with	good questions but not	too closed questions A	ves or no answer	r is often not very us	eful to test your assur	mntions	
Be sharp and entited with	good questions, but not	too closed questions. A	yes of the unswel	is often not very as	iciai to test your assur	приопо.	
6 Outcome Processi	na Posult? Lavovout	ostod what you want to t	tost? (it hannons :	more often that you	(also) got answers to	other needs)	
6 Outcome, Processi - Do you need to test age		ested what you want to t	rest: (ir nappens i	nore often that you	(aiso) yet alisweis to (	outer needs)	
<ul><li>How does this change y</li><li>Adjust it and see if your</li></ul>		ye your idea even sharps	ar				
- Aujust it allu see il you l	reed to test again to mak	e your luea even shalpe	51.				WDKA
